

Quality Policy

“Making Reliability a Reality” is our philosophy and within the framework of this guiding principle, all of us at Ryobi are totally committed to further expansion of our technological capabilities as we confront the coming changes of our future.

Our aim must be for everyone to become involved with processes and actions which will ensure that our customers obtain the highest quality product and service we can give. We are committed to complying with all requirements and continually improving the effectiveness of the Quality Management System.

Top management shall define goals, objectives and measurements for deploying the Quality Policy and objectives shall be included in the business plan. Goals and objectives should be based on customer expectations and requirements and should be achievable within a defined time period.

The Quality Systems operated by Ryobi Aluminium Casting (UK), Limited are in full compliance to ISO 9001 / TS16949.

Scope

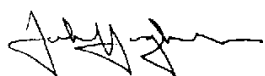

RAC (UK)'s scope of registration is,

“High pressure die casting, machining and assembly of aluminium parts for the automotive industry”

The scope will not cover the design of the product as this will be the responsibility of the customer.

Copies of this Quality Policy are available internally through the Intranet, externally at www.ryobi.co.uk or hard copies can be obtained on request
